Subject: Request for Information on Broadband Coverage in Chesterfield, NH

To: Andrew T. Bauer
Argent Communications
PO Box 278
Bristol, NH 03222

Dear Andrew:

The Town of Chesterfield is Requesting Broadband Coverage information to determine the unserved locations in town as defined by RSA 38:38, I(c). An unserved location is defined as a location that does not have access to at least 25 Mbps download/3 Mbps upload speeds (25 Mbps/3 Mbps). The location does not need to be subscribing to this service, but the service must be available at the street location. You may provide either a list of unserved addresses or a list of served addresses to meet this request. Per SB 170, you have 2 months to respond to this request. A preferred response method would be a list in spreadsheet format with specific addresses itemized and whether those addresses have the required service available.

The Town of Chesterfield is making this request following the requirements of SB 170 in order to pursue the option of the Town Bonding upgrades to the Broadband infrastructure to meet the 25/3 specification. Once information is received (or the 2 months lapses) the Town will issue a Request for Proposal (RFP) for improving the Broadband infrastructure from all providers who would consider entering into a public-private partnership with the Town.

If you have any questions, please contact me by phone or email.

Regards,

A handwritten signature in cursive script that reads "Alissa Fox".
