<i>% Change</i>	4.6%	4.8%	3.7%	7.9%	14.3%	15.3%	23.6%

Corridor In- and Out-Commuting

In-commuters work inside the region and live outside of it. Out-commuters, meanwhile, live in the corridor, and work outside of it. A third category of workers both live and work within the corridor.

Top Commuting Origin-Destination (O-D) Pairs

Commuting O-D pairs describe where workers are traveling from (their home) and where they are traveling to (their place of work). The table below distinguishes between commuters who *work* in the region and those that *live* in the region. There is some overlap between these two groups—commuters who both work and live within the corridor. Therefore, some O-D pairs may appear on both side of the table.

Commuters Working in Corridor Communities			Commuters Living in Corridor Communities		
Residence	# Commuters	Workplace	Residence	# Commuters	Workplace
Troy	390	Keene	Troy	390	Keene
Fitzwilliam	218	Keene	Fitzwilliam	218	Keene
